

# Wolfson Children's Health Center

## Health Center Frequently Asked Questions

### What is the Wolfson Children's Health Center?

The Wolfson Children's Health Center is a full-service pediatrician's office that opened in January 2018. Our experienced doctor and caring staff offer well child check-ups, sick visits, vaccinations, lab tests, sports physicals, and developmental screenings. We welcome students as well as all children age 0 through age 20.

### Who is behind the Wolfson Children's Health Center?

Wolfson Children's Health Center is a collaboration between Wolfson Children's Hospital, Duval County Public Schools, the Duval County Department of Health, Sulzbacher Center, Agape Community Health, UF Health Jacksonville and Full Service Schools. These organizations have partnered together to ensure that all children can have easy access to health care — not only when they're sick, but for preventive services as well.

### Where is the Wolfson Children's Health Center located?

The Wolfson Children's Health Center is located in the Ribault Family Resource Center, which is located on the campus of Ribault Senior High School. There is parking directly in front of the resource center and you do NOT need to enter the main office of the school to gain access to the resource center. There is directional signage on the campus leading back to the resource center. The health center is open year-round, Monday-Friday, including summer.

### **What does it cost to utilize services at the Wolfson Children's Health Center?**

The clinic at the Wolfson Children's Health Center is operated by the Sulzbacher Center, a Federally Qualified Health Center. We accept most insurance plans and a co-pay may be required based on your insurance plan. For children who do not have insurance, we offer a sliding-fee, income-based discount. Our staff is available to assist families in enrolling in insurance through Florida KidCare.

### **Are walk-ins accepted? How can I make an appointment?**

While walk-ins are accepted, we encourage parents to schedule an appointment. The phone number is 904.924.1624. The health center is open year round (except on major holidays), Monday-Friday.

### **Can a child receive services without a parent present?**

While we encourage parents/guardians to attend appointments with their child, students with a signed parental consent form on file can receive services without a parent or guardian present. The consent form can be picked up from the health center, or can be found on our website at [schoolhealthjax.com](http://schoolhealthjax.com). The health center staff will make every effort to communicate the services and health education their child received. Please note that the State of Florida allows minors to receive certain health services without parental permission, such as testing or treatment for Sexually Transmitted Diseases (STDs) or pregnancy. SBHC staff will strongly encourage children who receive those services to talk with their parents and involve them in their healthcare decisions.
